Content

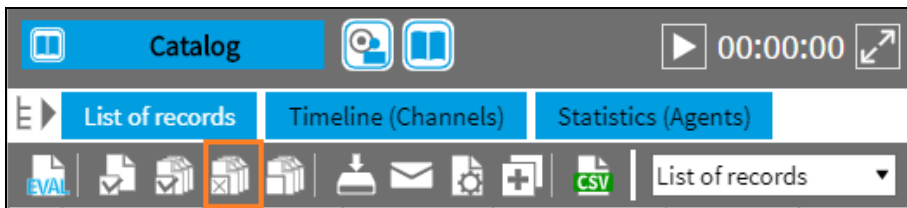

1. KNOWN INCOMBATIBILITIES	4
2. CATALOG	5
3. SYSTEM.....	7
4. USERS	10
5. PLAYER	11
6. OTHERS.....	11

1. Known incompatibilities

- Audio live monitoring in Chrome and Firefox web browser
 - start listening is delayed for about 7 seconds.
 - online delay of about 7 seconds.
- Frequency of video updates during playback of screen records can depend on number of synchronously replayed channels.
- **Internet Explorer 11** browser incompatibilities:
 - Inoperative volume control of individual directions.
 - Control playback of individual channel directions to the left / right speaker.
 - Playing CCTV recordings is not possible with the combination of Windows 7.
 - A problem with removing stops on the player.
 - Does not support live monitoring.
 - Playback of SCREEN records is not possible in a new window.
 - Slow retrieving and filtering lists - When entering the initial letters of a search string, the larger list is updated very slowly (eg using the Agent, Group, Source) parameters.
 - HID Records: bad Interpretation of time.
 - Spoken time: a possible time synchronization error in some versions of Windows.
 - IE11 - synchronous playback does not work.

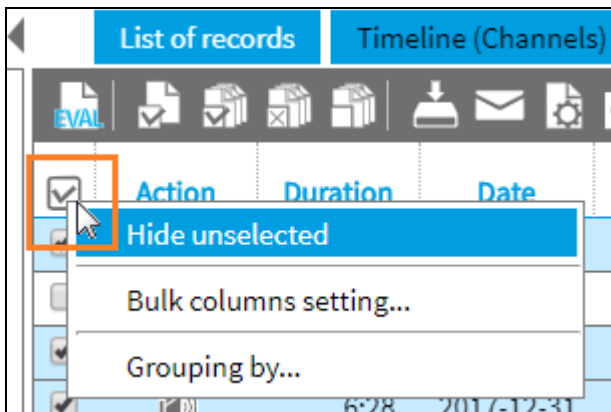

2. Catalog

➤ Changing debugging

The new Unselect all on pages icon allows you to deselect everything on the page with respect to the selected time range and the applied filter. The icon is only present in the **Catalog/List of records** application.

A new option **Hide unselected** to view all selected records (or hide unselected) across time ranges or filters. The option will be displayed when the popup menu is highlighted above the "Hide unselected on pages" checkbox.

 " *Hide unselected on pages*" - the option hides unselected records only on that page - that is, with regard to time or filters.

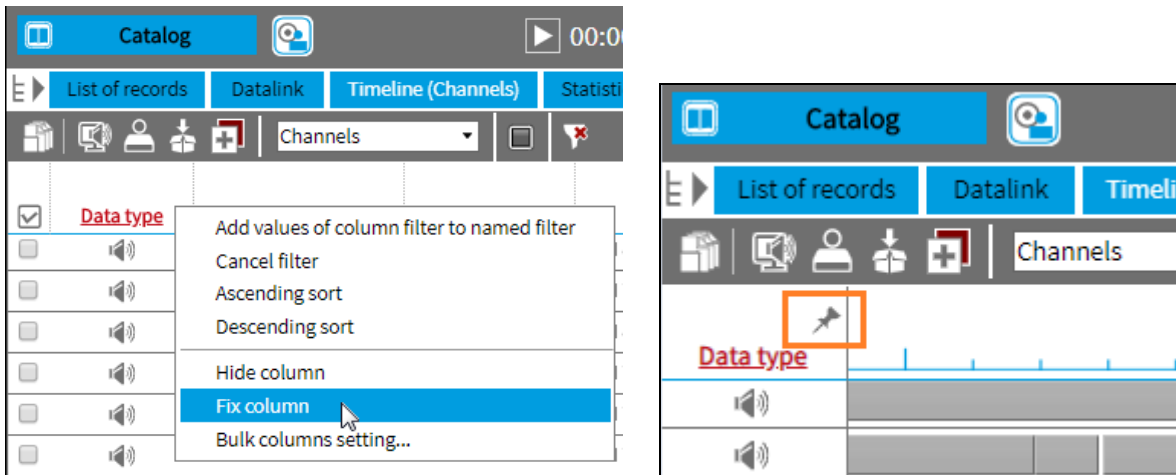

The information bar at the bottom of **ReDat eXperience** displays the number of records that are actually marked regardless of the time range and filters.

ReDat eXperience 2.35.1 Release notes

➤ Pin icon on fixed column

Pin icons have been added for better visibility of all is fixed columns (in a **Catalog/Timeline**).

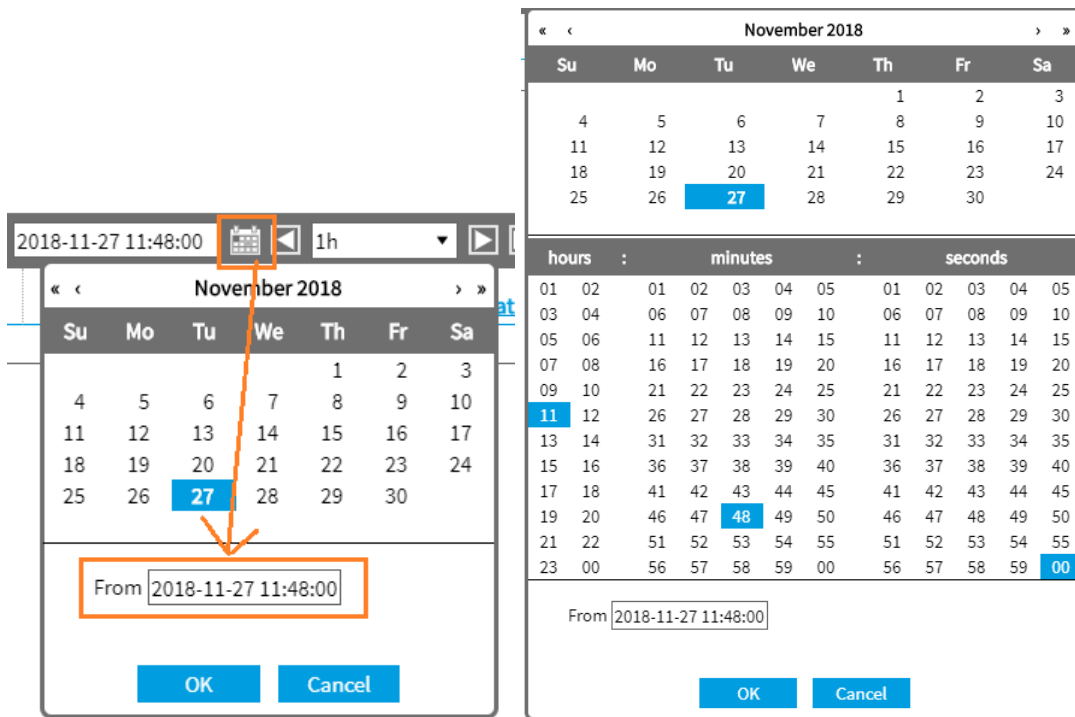

➤ Export to CSV

When exporting to CSV, the number of exported items will be written to the *Details* field in the **Audit** application.

Event	Module	Details
Export of selected records into CSV	Catalog	reclist; Total 23 items

➤ Select time in the calendar

When you click on a date box, a table with a detailed selection of digits will appear on the calendar.

This feature was also implemented in the latest releases of version 2.35.0.

3. System

➤ SSO login

After you enter the parameter **app_login_sso** = 1 (from the setting table), a dialog box opens for logging in with another login or sso.

- A user logged in via SSO is never logged out automatically by the system.
- The SSO sign-in dialog will only appear if you manually log off.

➤ Channel Type – Comparison

The parameter uses only the replication service for the comparison of records.

The screenshot shows the 'Parameters of eXperience' dialog box with the following settings:

- Active:
- Assign: Yes
- Group: root
- Type of channel: Normal
- Coupled channel: (empty)
- Compression: -- not selected --
- Type of channel - comparison: Normal (highlighted)

The **Type of channel - comparison** option appears only if the `dontSaveRedundant = 1` parameter is set in the setting table.

➤ Lock complete calls without screens

In the **Expiration - Records**, the option *Lock complete calls without screens* has been added. The option will only appear when the Screeny license is available. When tagging only the audio recording is locked, screens will be deleted.

The screenshot shows the 'General' dialog box for 'Expiration - Records' with the following settings:

- Name: default delete
- Active:
- Type:
 - Lock
 - Lock complete calls
 - Lock complete calls without screens (highlighted)
 - Guarantee
 - Remove after: 3 days
 - Delete archived files after: (empty) days
- Filter: none

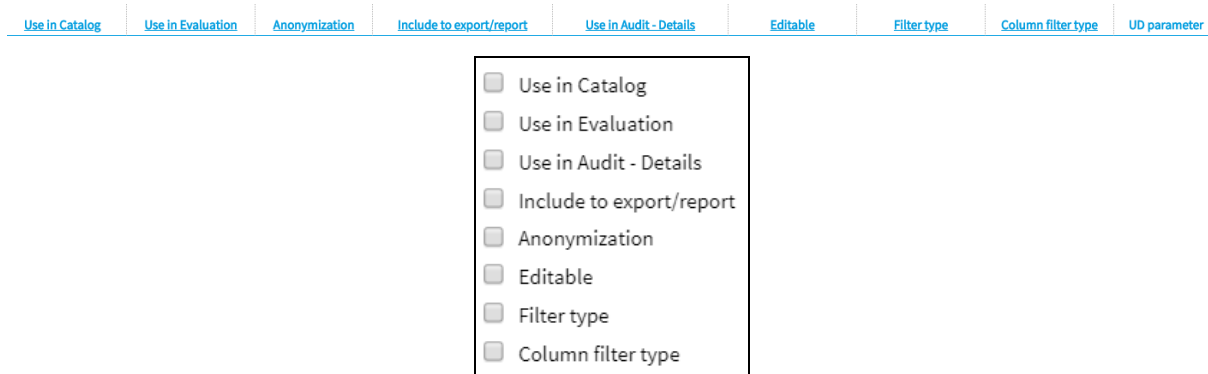

Lock records (via expiry conditions or manually) can only be provided by the recording archive flag set **Archive** or **Archived**.

ReDat eXperience 2.35.1 Release notes

➤ System/Data/Data columns

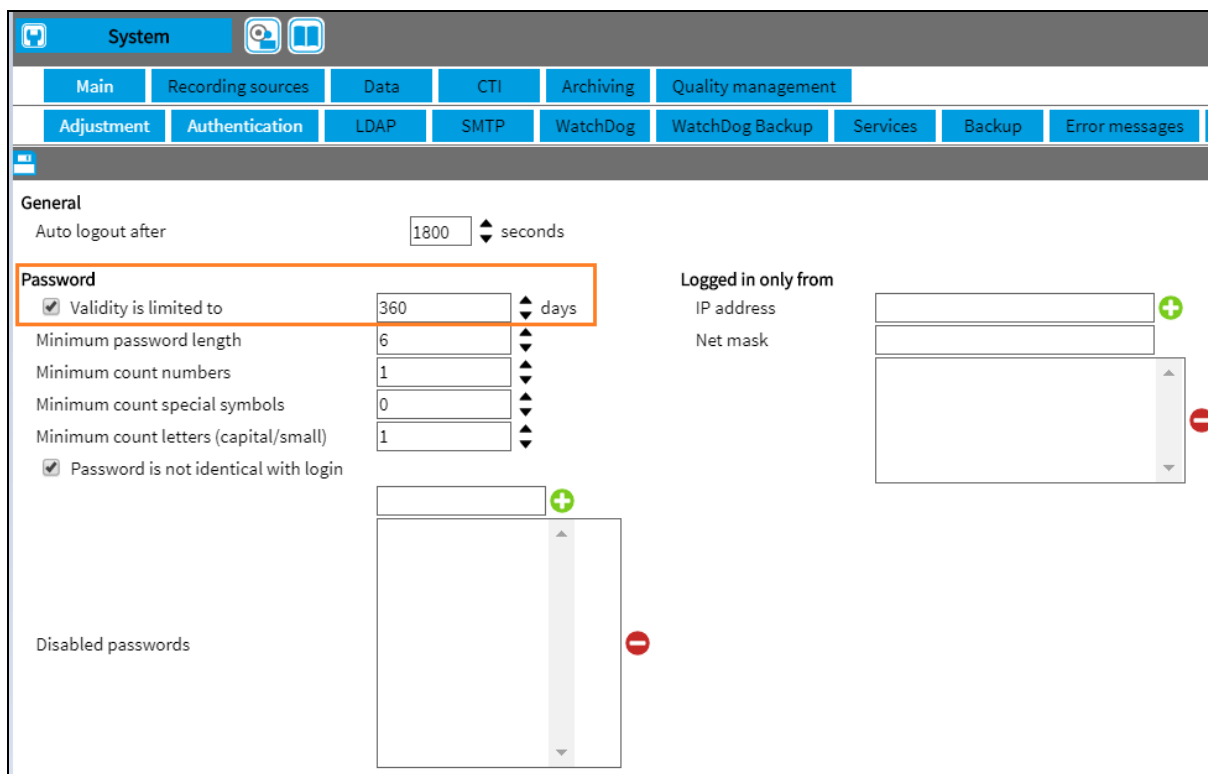

Columns have been merged, in the Data columns agenda, with bulk editing options.

➤ System/Main/Authentication

The new option **Validity is limited to**

- the main system password limit for all users (excluding superusers)
- The maximum number of days is 360.
- If not checked, the validity of the password is unlimited.

When you sign in with an invalid password in the GUI, a password change dialog appears. When you click OK, the message "Password changed successfully, you can continue" appears, the user is properly logged in and does not need to log in again.
via chapter 4. Users

ReDat eXperience 2.35.1 Release notes

➤ System/CTI/CTI Servers

For the Alcatel-Lucent type, a backup CTI server and port configuration has been added.
